

Brokerage event in Aeronautics, Aerodays 2011

The European Commission (Directorate-General for Research) The Centre for the Development of Industrial Technology (CDTI) – an entity under the Spanish Ministry of Science and Innovation – are organising the Sixth European Aeronautics Days. The Aerodays will be held from 30th March to 1st April 2011 in Madrid.

Following on from its successful predecessors in Brussels (1991), Naples (1993), Toulouse (1997), Hamburg (2001) and Vienna (2006), the aim of this not-to-be-missed event for the aviation sector is to bring together aeronautics stakeholders, ministries, agencies and research institutes from all over Europe and beyond to network, present their latest research results and discuss common future Research and Technological Development (RTD) projects.

In particular, the conference will contribute to moving forward the state of play on EU-funded RTD results and will be in line with the EU goals of creating a single European sky and a European Research Area and of finding innovative approaches to sustainable aviation in a global environment.

In view of the importance of widening this discussion in order to cope with the new challenges arising in the areas related to aeronautics and air transport in the European Union Framework Programmes, we would be honoured if you could

attend.

The event will bring together aeronautics stakeholders, ministries, agencies and R&D centres from all over Europe and overseas to network, present their latest research results and to discuss common future R&D projects

Brokerage event

Within the framework of AERODAYS 2011, Enterprise Europe Network madri+d will organize from 30th to 31st of March in collaboration with Instituto Nacional de Tecnología Aeroespacial, Universidad Carlos III de Madrid, Universidad Politécnica de Madrid and Universidad de Alcalá an international transfer technology day to exchange information between possible technological partners.

Main objective of the event is to create a meeting forum for companies, research institutes, universities and other organizations that are actively engaged within the field of Aeronautics. Participants may provide opportunities for collaboration and business based on technology, through aimed-to-agreement bilateral meetings.

The brokerage event will be also supported Aerospace Madrid Cluster.

Participants should register themselves at the website of the event, <http://www.enterprise-europe-network.ec.europa.eu/public/bemt/home.cfm?EventID=2541> providing at least one technology profile describing either a technology offer or a technology request. All technological profiles will be published at the event online catalogue, which is continuously updated according to the profiles submitted and represents the basis to select partners for discussions and to organize bilateral meetings.

Dates for registration and submission of profiles:

- Registration and submission of profiles: 5th March.
